

Empresa

● addCliente():void

Cliente

```
classDiagram
    Empresa "1" *-- "N" Cliente
```

The diagram illustrates a composition relationship between the 'Empresa' class and the 'Cliente' class. The 'Empresa' class is represented by a rectangle with three horizontal compartments. The top compartment contains the class name 'Empresa'. The middle compartment is empty. The bottom compartment contains a method signature 'addCliente():void', where the opening parenthesis is highlighted in green and the return type 'void' is in red. The 'Cliente' class is represented by a rectangle with three horizontal compartments. The top compartment contains the class name 'Cliente'. The middle and bottom compartments are empty. A solid line with an open diamond at the 'Empresa' end and an arrowhead at the 'Cliente' end connects the two classes, indicating that 'Empresa' is composed of 'Cliente'.
